

A close-up, shallow depth-of-field photograph of human vertebrae, showing the intricate structure of the spine. The vertebrae are light-colored and appear to be part of a larger skeletal structure. The background is dark, making the bones stand out.

EUROPEAN MUSCULOSKELETAL REVIEW

MEDIA PACK

Supporting physicians,
clinicians and related healthcare
professionals in continuously
developing their knowledge,
effectiveness and productivity

www.touchmusculoskeletal.com

Overview

European Musculoskeletal Review is a peer-reviewed quarterly journal comprising review articles, case reports, practice guides, theoretical discussions and original research. It features balanced and comprehensive articles written by leading authorities addressing the most important and salient developments in the musculoskeletal field.

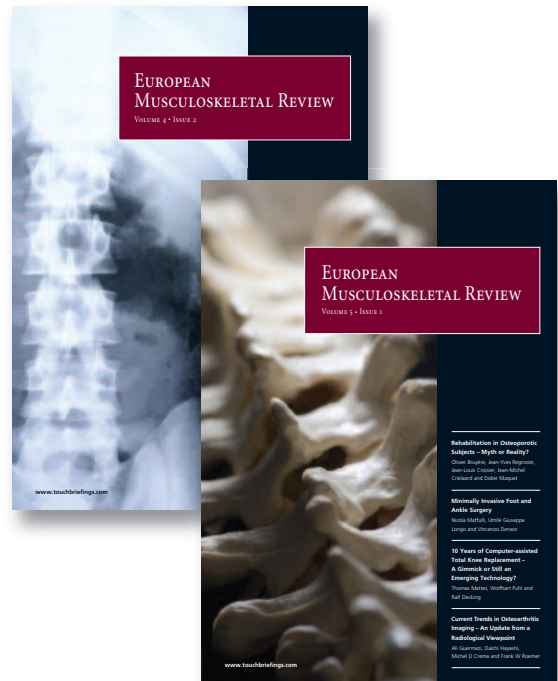

European Musculoskeletal Review endeavours to support physicians, clinicians and related healthcare professionals in continuously developing their knowledge, effectiveness and productivity.

Issues per annum: 4

Editorial Expertise

European Musculoskeletal Review is supported by various levels of expertise:

- Guidance from an Editorial Board consisting of leading authorities from a variety of musculoskeletal disciplines.
- Invited contributors are recognised authorities from their respective fields.
- Peer review conducted by experts appointed for their experience and knowledge of a specific topic.
- An experienced team of Editors and Technical Editors.
